A word is represented by only one set of numbers as given in any one of the alternatives. The sets of numbers given in the alternatives are represented by two classes of alphabets as shown in the given two matrices. The columns and rows of **Matrix-I** are numbered from 0 to 4 and that of **Matrix-II** are numbered from 5 to 9. A letter from these matrices can be represented first by its row and next by its column, for example, 'J' can be represented by 42, 87, etc., and 'N' can be represented by 04, 89, etc. Similarly, you have to identify the set for the word "EXACT".

एक शब्द केवल एक संख्या-समूह द्वारा दर्शाया गया है, जैसा कि विकल्पों में से किसी एक में दिया गया है। विकल्पों में दिए गए संख्या-समूह अक्षरों के दो वर्गों द्वारा दर्शाए गए हैं, जैसा कि दिए गए दो आव्यूहों में है। **आव्यूह-I** के स्तम्भ और पंक्ति की संख्या 0 से 4 है और **आव्यूह-II** की 5 से 9। इन आव्यूहों से एक अक्षर को पहले उसकी पंक्ति और बाद में स्तम्भ संख्या द्वारा दर्शाया जा सकता है। उदाहरण के लिए 'J' को 42, 87 आदि द्वारा दर्शाया जा सकता है तथा 'N' को 04, 89, आदि द्वारा दर्शाया जा सकता है। इसी तरह से आपको प्रश्न में दिए शब्द "EXACT" के लिए समूह को पहचानना है।

Is my yellow the same as your yellow? Does your pain feel like my pain? The question of whether the human consciousness is subjective or objective is largely philosophical. But the line between consciousness and unconsciousness is a bit easier to measure. A research suggests that our experience of reality is the product of a delicate balance of connectivity between neurons - too much or too little and the consciousness slips away. "It's a very nice study," says neuroscientist Melanie Boly at the University of Wisconsin, Madison, who was not involved in the work. "The conclusions that they draw are justified." Previous studies of the brain have revealed the importance of "cortical integration" in maintaining consciousness, meaning that the brain must process and combine multiple inputs from different senses at once. Our experience of an orange, for example, is made up of sight, smell, taste, touch, and the recollection of our previous experiences with the fruit. The brain merges all of these inputs - photons, aromatic molecules, etc. - into our subjective experience of the object in that moment.

During the Victorian period men and women's roles became more sharply defined than at any time in history. In earlier centuries it had been usual for women to work alongside husbands and brothers in the family business. Living 'over the shops' made it easier for women to help out by serving customers or keeping accounts while also attending to their domestic duties. As the 19th century progressed men increasingly commuted to their place of work- the factory, shop or office, wives, daughters and sisters were left at home all day to oversee the domestic duties that were increasingly carried out by servants. From the 1830s, women started to adopt the crinoline, a huge bell-shaped skirt that made it virtually impossible to clean a grate or sweep the stairs without tumbling over. The two sexes now inhabited what Victorians thought of as 'separate spheres', only coming together at breakfast and again at dinner.
