# 200 Questions

**Que. 1** Directions: Study the following information and answer the question given below:

In a State Public Service Commission, eight exams were conducted for the post of Forest Officer, College Lecturer, Assistant Statistical Officer, Agriculture Officer, Pharmacist, I Grade Teacher, II Grade Teacher, III Grade Teacher on the 15<sup>th</sup> and 20<sup>th</sup> of January, February, March, and April but not necessarily in the same order. Eight persons Rajat, Rajesh, Ram, Raman, Ranjan, Ratan, Ritesh, and Rishi were the incharge of these eight exams but not necessarily in the same order.

Ratan was the incharge of the Agriculture Officer exam and four exams were scheduled after the Agricultural Officer exam. Two exams were scheduled between exams under the charge of Ratan and Rajat. Rishi was the incharge of the exam scheduled on the 20<sup>th</sup> of a month, but after the exam under the charge of Ratan. The exam for the post of Forest Officer was scheduled on the 15<sup>th</sup> of March. III Grade Teacher exam was conducted immediately before II Grade Teacher exam. The Assistant Statistical Officer exam was under the charge of Rishi but was not conducted immediately after the Forest Officer exam. Ritesh was the incharge of the College Lecturer exam and was scheduled in the month of April. Rajat was neither the incharge of III Grade Teacher nor I Grade Teacher. Ranjan was the incharge of the exam scheduled on the 20th of the month but after II Grade teacher exam. Rajesh was the incharge of an exam conducted after the Agriculture Officer. The pharmacist exam was scheduled before the Agriculture Officer exam. Raman was not incharge of the exam scheduled immediately after the Pharmacist exam.

When was College Lecturer exam scheduled?

- 1. 15 April
- 2. 20 February
- 3. 15 January
- 4. 20 April
- 5. 15 February

Testbook Solution Correct Option - 1

**Que. 2** Who was the incharge of I Grade Teacher exam?

- 1. Rajat
- 2. Ranjan
- 3. Ritesh
- 4. Rishi
- 5. Ram

**Testbook Solution** Correct Option - 2

**Que. 3** When was the exam under the charge of Ram scheduled?

- 1. 15th February
- 2. 20th April
- 3. 20th February
- 4. 20th January
- 5. 15th March

**Que. 4** Who is incharge of the exam scheduled on 15 March?

- 1. Ritesh
- 2. Ram
- 3. Rajesh
- 4. Ranjan
- 5. Raman

Testbook Solution Correct Option - 3

Que. 5 Direction: In the question below are given three statements followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements disregarding commonly known facts

#### **Statements:**

Only a few Bottles is Cup

Some Cup is Spoon

Some Spoon is Caps

#### **Conclusions:**

- I. Some Bottles is not Cup
- II. All Caps is Spoon
  - 1. Only I follow
  - 2. Only II follow
  - 3. Either I or II follows
  - 4. Neither I nor II follows
  - 5. Both I and II follows

Testbook Solution Correct Option - 1

Que. 6 Direction: In the question below are given three statements followed by two conclusions numbered I and II You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements disregarding commonly known facts.

#### **Statements:**

Only a few Ice is Cube.

Some Cube is Circle.

Some Circle are Square.

## **Conclusions:**

- I. Some Ice is not Cube.
- II. Some Cube is Square.
  - 1. Only I follow
  - 2. Only II follow
  - 3. Both I and II follow
  - 4. Either I or II follows
  - 5. Neither I nor II follows

Que. 7 Direction: In the question below are given three statements followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements disregarding commonly known facts.

#### **Statements:**

Some orange is tomato

Only a few tomato is apple

All apple is lemon

#### **Conclusions:**

- I. Some lemon is orange
- II. Some tomato is not apple
  - 1. Only I follows
  - 2. Only II follows
  - 3. Either I or II follows
  - 4. Neither I nor II follows
  - 5. Both I and II follows

Testbook Solution Correct Option - 2

Que. 8 Direction: Study the following information carefully to answer the given questions:

Eight persons M, N, O, P, Q, R, S and T live on different floors of a building. The bottommost floor is numbered as 1, floor above it as 2 and so on. P lives three floors above M, who lives just above Q. O lives two floors above N, who does not live on even numbered floor. P does not live on topmost floor. R lives above S, who does not live on bottommost floor.

Who lives on bottommost floor?

- 1. O
- 2. R
- 3. T
- 4. M
- 5. S

Testbook Solution Correct Option - 3

Que. 9 How many persons live above S's floor?

- 1. Five
- 2. Four
- 3. Two
- 4. Three
- 5. One

Testbook Solution Correct Option - 2

**Que. 10** How many persons live between P's and T's floor?

- 1. Four
- 2. Three

- 3. Two
- 4. Five
- 5. One

# **Que. 11** Who lives three floors below O?

- 1. 5
- 2. P
- 3. R
- 4. O
- 5. M

Testbook Solution Correct Option - 1

Que. 12 Directions: Study the information given below carefully and answer the questions that follow.

In a town, there are ten houses E, F, G, H, I, J, K, L, M, and N. G is 10km north of E and F is 2km east of E. J is 10km south of I and L is 2km west of M. K is 4km east of E.H is 7km west of F while I is 12km south of G. L is 12km south of F and N is 5km north of F.

N is in which direction and what distance with respect to L?

- 1. North, 17 km
- 2. South, 15 km
- 3. East, 5 km
- 4. West, 10 km
- 5. North, 10 km

## Testbook Solution Correct Option - 1

# Que. 13 What is the distance between G and J?

- 1. 10 km
- 2. 20 km
- 3. 22 km
- 4. 15 km
- 5. 21 km

## Testbook Solution Correct Option - 3

# Que. 14 What is direction of M with respect to E?

- 1. North-South
- 2. South-East
- 3. South-West
- 4. North-West
- 5. East

Que. 15 Direction: Study the following information carefully and answer the question given below.

There are eight members in the family - F, J, M, P, R, U, W and X. P is the father-in-law of U. U is the mother of F and the only child of X. J is the husband of X. M is the brother of F. F is the son of W. R is the mother of W.

How many female members are there in the family?

- 1. Two
- 2. Three
- 3. Four
- 4. Five
- 5. Either four or five

#### Testbook Solution Correct Option - 2

## **Que. 16** How is F related to J?

- 1. Grandson
- 2. Brother
- 3. Nephew
- 4. Son
- 5. Father

# Testbook Solution Correct Option - 1

Que. 17 Directions: Study the information carefully and answer the questions given below.

Eight persons Anil, Dolly, Bina, Girish, Chetan, Esha, Falak and Hitesh are sitting around a square table but not necessarily in the same order. Four persons sit at the corner side of the table while other four sit at the middle side of the table. The persons who sit at the corner face inside while others face outside. They also have different ages i.e. 15 years, 17 years, 13 years, 18 years, 24 years, 22 years, 23 years and 28 years but not necessarily in the same order. Falak sits second to the left of Anil and second to the right of the person whose age is 23 years. Dolly sits third to the left of the person whose age is 13 years and faces outside. Neither Falak nor the persons whose age is 23 years is an immediate neighbour of Chetan. Bina sits immediate to the left of Falak and his age is 24 years who sits opposite to the one whose age is 22 years. Esha sits second to the left of the person whose age is 5 years less than the age of Chetan's age. Chetan's age is an even number and Esha sits at the corner side of the table. Hitesh is five years elder to Girish. Age of Girish is 25 years less than the total age of Anil and Esha.

Who sits second to the right of the one whose age is 5 years less than the age of Chetan?

- 1. Dolly
- 2. The one who is 22 years old
- 3. Anil
- 4. Hitesh
- 5. Falak

# Testbook Solution Correct Option - 3

**Que. 18** The sum of the ages of which of the following pairs is exactly the same?

- 1. Bina, Chetan & Anil, Esha
- 2. Dolly, Hitesh & Bina, Chetan
- 3. Falak, Girish & Anil, Esha

- 4. Falak, Girish & Bina, Esha
- 5. None of these

## **Que. 19** Who among the following sits fourth to the right of Anil?

- 1. Hitesh
- 2. Esha
- 3. Girish
- 4. Bina
- 5. Falak

#### Testbook Solution Correct Option - 2

# Que. 20 Who among the following sits immediately to the left of Bina?

- 1. The person who is 23 years old
- 2. Dolly
- 3. The person who is 17 years old
- 4. The person who is 13 years old
- 5. None of these

## Testbook Solution Correct Option - 3

# Que. 21 Arrange the sentences in the correct order and answer the following questions.

A. Over the past year, perceptions of relative U.S. economic power have declined in many of America's key trading partners and allies.

B. Following the onset of the financial crisis nearly a decade ago, Europeans increasingly named China, rather than the U.S., as the world's leading economic power.

C. This year, however, the pattern has reversed itself again, and in countries such as Germany, the United Kingdom, and Spain, China is once more seen as occupying the top spot.

D. But in recent years, as the American economy slowly recovered, the pendulum began to swing back in the direction of the U.S.

E. The trend can be seen in several European countries, where views about the economic balance of power have fluctuated in recent years.

#### Which of the following is the **FIRST** statement?

- 1. A
- 2. B
- 3. C
- 4. D
- 5. E

#### Testbook Solution Correct Option - 1

## Que. 22 Which of the following is the SECOND statement?

- 1. A
- 2. B

3.	C	
4.	D	
5.	Е	
Test	bool	Solution Correct Option - 5
Que.	23	Which of the following is the <b>THIRD</b> statement?
1.		A
2.	В	
3.	C	
4.	D	
5.	E

Erro	Directions: In the following sentence, 4 words are given incorrectly placed and need to be interchanged. If there in rror' can be selected.  Ouisiana communities faced(A) by Hurricane Ida battered(B) a new sk of clearing debris and massive(D) damage from the storm.	e is no need for interchanging then 'No

2. congest

cooperate

3.

- 1. CDBA
- 2. ABDC
- 3. BADC
- 4. BACD
- 5. No error

Que. 32 Directions: In the following sentence, 4 words are given in bold. Two or more of these words are incorrectly placed and need to be interchanged. If there is no need for interchanging then 'No Error' can be selected.

China's Tianwen-1 Mars mission will be **disruption** (A) for about 50 days from mid-September due to an expected **inactivated**(B) of its **communication**(C) with Earth **caused**(D) by the solar electromagnetic radiation.

- 1. BACD
- 2. ABDC
- 3. ACBD
- 4. BCDA
- 5. No error

Testbook Solution Correct Option - 1

Que. 33 Directions: In the following questions, a sentence is given with five words marked as (A), (B), (C), (D) & (E). These words may or may not be placed in their places. Four options with different arrangements of these words are given. Mark the option with the correct arrangement as the answer. If there is no change required, mark 'No rearrangement required' as your answer.

Sport brings **country** (A) and **natural** (B) from across the **witness** (C) and the globe together—tennis, as a sport, has a **communities** (D) social distancing — so it's great to **people** (E) it back in action.

- DEABC
- 2. CEDAB
- 3. BADCE
- 4. DABCE
- 5. No Rearrangement Required

Testbook Solution Correct Option - 1

Que. 34 Directions: In the following questions, a sentence is given with five words marked as (A), (B), (C), (D) & (E). These words may or may not be placed in their places. Four options with different arrangements of these words are given. Mark the option with the correct arrangement as the answer. If there is no change required, mark 'No rearrangement required' as your answer.

Matched (A) Andre Agassi his all-time opponent (B) favourite (C) on the court, Paes says that their styles of play always calling (D) up against each other over decades. (E)

- 1. BADEC
- 2. DCBAE
- 3. CEDAB
- 4. EDACB
- 5. No Rearrangement Required

Que. 35 Directions: In the following questions, a sentence is given with five words marked as (A), (B), (C), (D) & (E). These words may or may not be placed in their places. Four options with different arrangements of these words are given. Mark the option with the correct arrangement as the answer. If there is no change required, mark 'No rearrangement required' as your answer.

One of the most **decorated** (A) **sportsmen** (B) in the country, and greatest doubles players in the **history**(C) of tennis, Leander Paes has **seen** (D) it all during his inspirational career that goes back over three **decades**.(E)

- AEDBC
- 2. EDCBA
- 3. DEBCA
- 4. CADBE
- 5. No Rearrangement Required

Testbook Solution Correct Option - 5

Que. 36 In the following passage, some of the words have been left out. Read the passage carefully and select the correct answer for the given blanks out of the given alternatives.

When we exercise, our muscles process insulin and absorb the resulting glucose as energy. Reduce that energy expenditure and your muscles will adapt physiologically to become a little less insulin sensitive, says John Thyfault, a researcher at the University of Kansas. Losing insulin sensitivity means your body converts sugar into fat rather than using it as energy to power your movements. And while that (1) helped our huntergatherer ancestors survive a feast-or-famine lifestyle, it's bad news for the modern desk jockey, because improper regulation of insulin can your cells to store some of what's not used in muscle movement as (2) fat. This change puts you at greater risk for the foundation of other conditions, such as Type 2 diabetes and inflammation. Thankfully, your body can adapt pretty quickly to increased insulin sensitivity with just a little bit of exercise and healthier eating. High-volume and high-intensity exercise can be equally effective at making your body more sensitive. Just a 30-minute walk or a ten-minute HIIT regimen a few times a week will keeping your body eagerly processing insulin. You're going to get small and it'll happen fast. The gains you made from a lifting routine will \_\_\_(5)\_\_\_ within a week of quitting the weights. But smaller doesn't mean weaker.

Which of the following words fits the blank labelled as (1)?

- 1. Impediment
- 2. Discreet
- 3. Vie
- 4. Adaptation
- 5. Congregation

Testbook Solution Correct Option - 4

Que. 37 Which of the following words fits the blank labelled as (2)?

- 1. Prompt
- 2. Elusive
- 3. Cavort
- 4. Diminish
- 5. Elope

Oue. 38 Which of the following words fits the blank labelled as (3)?

- 1. Entice
- 2. Fustian
- 3. Suffice
- 4. Break
- 5. Devour

## Testbook Solution Correct Option - 3

Que. 39 Which of the following words fits the blank labelled as (4)?

- 1. Malice
- 2. Menial
- 3. Visible
- 4. Plausible
- Abstract

Testbook Solution Correct Option - 3

Que. 40 Which of the following words fits the blank labelled as (5)?

- 1. Enhance
- 2. Diminish
- 3. Encapsulate
- 4. Dubious
- 5. Tenuous

Testbook Solution Correct Option - 2

A sentence is given below with three words highlighted in bold. Select the option that gives the correct set of words. In case the sentence is correct, select 'No replacement required'.

Insomnia is becoming a very **stern** disease these days because of the **improving** levels of stress among the young generation due to **like** of employment opportunities.

- A. serious, increasing, lack
- B. static, impending, loss
- C. simultaneous, imploding, leave
- D. strict, improvising, lease
- E. No improvement required
  - 1. A
  - 2. B
  - 3. C
  - 4. D
  - 5. E

Testbook Solution Correct Option - 1

Que. 42 A sentence is given below with three words highlighted in bold. Select the option that gives the correct set of words. In case the sentence is correct, select 'No replacement required'.

He was not at all ready to **except** that his father was no more although he was all **adverse** to his **advise** regarding any matter during his lifetime.

- A. accustom, antiquity, suggestions
- B. accept, averse, advice
- C. expect, adduce, respect
- D. implies, attrition, recommendations
- E. No improvement required
  - 1. C
- 2. B
- 3. E
- 4. A
- 5. D

# Que. 43 A sentence is given below with three words highlighted in bold. Select the option that gives the correct set of words. In case the sentence is correct, select 'No replacement required'.

Economic reforms need to break the grip of **defamed** capitalism through more competitive markets, a reinstated fundamental right to property, greater reliance **by** rules rather than discretion, and a change in the way government contracts are **given**.

- A. extolled, through, allotted
- B. denounced, of, traded
- C. stigmatized, on, awarded
- D. vilified, upon, scored
- E. No improvement required
  - 1. E
  - 2. A
  - 3. C
  - 4. D
  - 5. B

## Testbook Solution Correct Option - 3

# Que. 44 Directions: Read the following passage and answer the questions accordingly.

Lunar water is water that is present on the Moon. It was first discovered by ISRO through its Chandrayaan mission. Diffuse water molecules can **persist** at the Moon's sunlit surface, as discovered by NASA's SOFIA observatory in 2020. Gradually water vapor is decomposed by sunlight, leaving hydrogen and oxygen lost to outer space. Scientists have found water ice in the cold, permanently shadowed craters at the Moon's poles. Water molecules are also in the extremely thin lunar atmosphere. Water (H<sub>2</sub>O), and the chemically related hydroxyl group (-OH), exist in forms chemically bound as hydrates and hydroxides to lunar minerals (rather than free water), and evidence strongly suggests that this is the case in low concentrations as for much of the Moon's surface. In fact, of surface matter, adsorbed water is calculated to exist at trace concentrations of 10 to 1000 parts per million. Inconclusive evidence of free water ice at the lunar poles had accumulated during the second half of the 20th century from a variety of observations suggesting the presence of bound hydrogen. On 18 August 1976, the Soviet Luna 24 probe landed at Mare Crisium, took samples from the depths of 118, 143, and 184 cm of the lunar regolith, and then took them to Earth. In February 1978, it was published that laboratory analysis of these samples shown they contained 0.1% water by mass. Spectral measurements showed minima near 3, 5, and 6 μm, distinctive valence-vibration bands for water molecules, with intensities two or three times

larger than the noise level. On 24 September 2009, it was reported that the NASA's Moon Mineralogy Mapper (M<sub>3</sub>) spectrometer onboard India's ISRO Chandrayaan-1 probe had detected absorption features near 2.8–3.0 μm on the surface of the Moon. But about 10 months before, on 14 November 2008, India's made Moon Impact Probe onboard Chandrayaan-1 orbiter landed into Shackleton crater and confirmed the presence of water ice. For silicate bodies, such features are typically attributed to hydroxyl- and/or water-bearing materials. In August 2018, NASA confirmed that M<sub>3</sub> showed water ice is present on the surface at the Moon poles. Water was confirmed to be on the sunlit surface of the Moon by ISRO on October 26, 2020. Water may have been delivered to the Moon over geological timescales by the regular bombardment of water-bearing comets, asteroids, and meteoroids or continuously produced **in situ** by the hydrogen ions (protons) of the solar wind impacting oxygenbearing minerals. The search for the presence of lunar water has attracted considerable attention and motivated several recent lunar missions, largely because of water's usefulness in rendering long-term lunar habitation feasible.

The presence of large quantities of water on the Moon would be an important factor in rendering lunar habitation cost-effective since transporting water (or hydrogen and oxygen) from Earth would be prohibitively expensive. If future investigations find the quantities to be particularly large, water ice could be mined to provide liquid water for drinking and plant propagation, and the water could also be split into hydrogen and oxygen by solar panel-equipped electric power stations or a nuclear generator, providing breathable oxygen as well as the components of rocket fuel. The hydrogen component of the water ice could also be used to draw out the oxides in the lunar soil and harvest even more oxygen.

According to the passage, what is theory behind the presence of water on the moon's surface?

- 1. Water may have been delivered to the Moon over geological timescales by the regular bombardment of water-bearing comets, asteroids, and meteoroids
- 2. Water may have been delivered to the Moon over geological timescales by the regular bombardment of planets
- 3. Water may have been delivered to the Moon over geological timescales by the regular bombardment of spaceships
- 4. Water is stored within glasses or in voids between grains sheltered from the harsh lunar environment, thus allowing the water to remain on the lunar surface.
- 5. The surface of that crater is covered in glacier

## Testbook Solution Correct Option - 1

**Que. 45** Why is discovery of water important on the Moon's surface?

- 1. in rendering long-term lunar habitation feasible
- 2. to harvest the seeds
- 3. in rendering lunar habitation cost-effective
- 4. Both 1 and 3
- 5. Both 1 and 2

Testbook Solution Correct Option - 4

**Que. 46** How water could also be split into hydrogen and oxygen?

- 1. by mining
- 2. by solar panel-equipped electric power stations
- 3. by nuclear generator
- 4. Both 2 and 3
- 5. None of the above

## Que. 47 Which was the first mission to discover the lunar water?

- 1. Chandrayaan mission
- 2. NASA's SOFIA
- 3. Luna 24
- 4. Both A and B
- 5. Both B and C

## Testbook Solution Correct Option - 1

# Que. 48 According to the passage which of the following statements is correct?

- 1. NASA's made Moon Impact Probe onboard Chandrayaan-1 orbiter landed into Shackleton crater and confirmed the presence of water ice
- 2. The search for the presence of Martian water has attracted considerable attention.
- 3. In August 2018, ISRO confirmed that M3 showed water ice is present on the surface at the Moon poles.
- 4. water vapor is decomposed by sunlight
- 5. None of the above

#### Testbook Solution Correct Option - 4

# Que. 49 What is the antonym of 'persist'?

- 1. persevere
- 2. continue
- 3. insist
- 4. abandon
- 5. endure

#### Testbook Solution Correct Option - 4

# **Que. 50** What is the meaning of 'in situ'?

- 1. generosity in bestowing money or gifts upon others
- 2. in the original place.
- 3. though
- 4. seize the day
- 5. for example

#### Testbook Solution Correct Option - 2

#### Que. 51 What is the full form of URL in the context of Internet?

- 1. Universal Resource Locator
- 2. Uniform Resource Locator
- 3. Universal Router Locator
- 4. Uniform Resource Location
- 5. None of these
